**30 July 2012**

### **RM Share Certificate Changes from 30 July 2012**

As part of their continued drive to enhance processes Capita Registrars have upgraded the technology used for the production of RM share certificates. These will now be produced on A4 paper with the new technology giving the certificate a more modern look and feel. The decision has also been made that there will no longer be an embossed seal on each certificate but a laser seal instead.
